

Group 12: Copyright/Legal Issues Report

Resource/Library	Licence	URL to Licence
Flutter SDK	BSD-3 Clause	https://github.com/flutter/flutter/blob/master/LICENSE
firebase_auth	BSD-3 Clause	https://pub.dev/packages/firebase_auth/license
cloud_firestore	BSD-3 Clause	https://pub.dev/packages/cloud_firestore/license
google_maps_flutter	BSD-3 Clause	https://pub.dev/packages/google_maps_flutter/license
cupertino_icons	MIT	https://pub.dev/packages/cupertino_icons/license
flutter_staggered_grid_view	MIT	https://pub.dev/packages/flutter_staggered_grid_view/license
fl_chart	MIT	https://pub.dev/packages/fl_chart/license
firebase_core	BSD-3 Clause	https://pub.dev/packages/firebase_core/license
location	MIT	https://pub.dev/packages/location/license
firebase_storage	BSD-3 Clause	https://pub.dev/packages/firebase_storage/license
image_picker	BSD-3 Clause	https://pub.dev/packages/image_picker/license
qr_flutter	MIT	https://pub.dev/packages/qr_flutter/license
screen_brightness	MIT	https://pub.dev/packages/screen_brightness/license

flutter_launcher_icons	MIT	https://pub.dev/packages/flutter_launcher_icons/license
provider	MIT	https://pub.dev/packages/provider/license
mobile_scanner	MIT	https://pub.dev/packages/mobile_scanner/license
http	BSD-3-Clause	https://pub.dev/packages/http/license
intl	BSD-3-Clause	https://pub.dev/packages/intl/license
geolocator	BSD-3-Clause	https://pub.dev/packages/geolocator/license
flutter_lints	BSD-3 Clause	https://pub.dev/packages/flutter_lints/license
test	BSD-3 Clause	https://pub.dev/packages/test/license

License Legal Implications

Certain libraries such as provider, mobile_scanner etc. have MIT licenses which mean that if we were to release this touchpoint, we would have to include original copyright notice and license text in our code and credit the original creators of these libraries if we do not want to release our own code.

Other libraries such as http and intl have BSD-3 Clause licenses so we can freely use these libraries but if we reuse the code (e.g. modify Firebase SDK) then we would have to include the BSD license and we mustn't imply that the original creators of these libraries endorse us.

With the Unsplash license for our images, we may use the images in our app without asking for permission or giving credit but we cannot resell these images.

Copyright Implications

We must not claim ownership of code that we did not create. Any third-party libraries can be used under permissive open-source licenses (such as MIT, BSD in this case) but we cannot claim ownership - only reuse is allowed. We must acknowledge the contribution of the creators of libraries we used and not use their names/logos as if they endorse our project.

If not, we can face copyright infringement which could result in our app being taken down or suspended, and we may even face legal action (e.g. lawsuits, forced to pay damages).

Wider legal implications

By the GDPR, only collect necessary data and ensure all users of our app grant consent. We must also grant users the right to access, correct or delete their data. So this could be done by having a terms and conditions page on the sign-up tab, having a way to edit/delete your profile etc. We would also have to store data securely and we could achieve this by enforcing rules to our Firebase system (e.g. certain users having specific access rights to the database rather than every developer having read-write access like we have in our current model).
